Section-A (Reading Comprehension- 10M)

1.Read the passage carefully.

Monsoon is a season with heavy rains caused by special winds that change direction. These rains come from the ocean and usually start around June, lasting until September. Monsoon rain is very important for farming because it waters the crops. People look forward to it because it cools down the hot weather and makes the land green again.

Rains are vital for several reasons. They provide the water needed for crops to grow, which is essential for food production. Rains also restock rivers, lakes, and groundwater, ensuring a steady water supply for drinking, irrigation, and other needs. It keeps the land green and supports all living things. Additionally, rain cools the atmosphere and helps clean the air by washing away dust and pollutants.
